About Me

Hi! My name is Dmytro, and I'm a PHP developer with a strong focus on WordPress and Laravel. I have 5 years of commercial experience working with WordPress — building, optimizing, and enhancing websites of any complexity. I also have 1 year of commercial experience with Laravel, developing flexible and scalable backend solutions.

In addition to backend development, I have frontend skills — creating responsive interfaces, integrating animations, and improving user experience (UX).

Wordpress - 5 Years Of Experience

What I do

- Creating custom themes
- Developing custom plugins
- Modifying and extending existing plugins and themes
- Website maintenance and updates
- Performance optimization (caching, queries, images)
- SEO optimization (technical and on-page)
- Security enhancements and hardening
- Integration with third-party APIs and services
- Testing and debugging (including WP_DEBUG and logs)
- Creating custom functions and shortcodes
- Advanced Custom Fields (ACF)
- WooCommerce customization and extensions
- Multilingual websites (WPML / Polylang)
- Custom post types and taxonomies
- REST API integration
- Elementor and other builders
- Version control (Git, Bitbucket, GitHub)

Laravel - 1 Years Of Experience

What I do

- Developing RESTful APIs
- Working with MVC architecture
- Database design and management (MySQL, migrations, seeders)
- Using Eloquent ORM for database operations
- Blade templating and dynamic views
- Form validation and request handling
- Integration with external APIs and services
- Using Middleware for request filtering and logic
- Error handling and logging
- Working with routes, controllers, and service layers
- Version control (Git, Bitbucket, GitHub)
