About me

Hi! My name is Roman, and I'm a PHP developer with a strong focus on WordPress.
I have 2 years of commercial experience working with WordPress — building, optimizing, and enhancing websites of any complexity.

In addition to backend development, I have frontend skills — creating responsive interfaces, integrating animations, and improving user experience (UX).

Wordpress -

2 years of experience

WHAT I DO

- Creating custom themes
- Developing custom plugins
- Modifying and extending existing plugins and themes
- Website maintenance and updates
- Performance optimization (caching, queries, images)
- SEO optimization (technical and on-page)
- Security enhancements and hardening
- Integration with third-party APIs and services
- Testing and debugging (including WP_DEBUG and logs)
- Creating custom functions and shortcodes
- Advanced Custom Fields (ACF)
- WooCommerce customization and extensions
- Multilingual websites (WPML / Polylang)
- Custom post types and taxonomies
- REST API integration
- Version control (Git, Bitbucket, GitHub)
